Muslims and Human Civilization

The additions of the Muslims to the Human Civilization are a fact that cannot be denied. The greatest non-Muslim scholars have stood a testimony to this fact in the numerous books they produced over centuries. It has been revealed that the Muslims made great and revolutionary contributions to the knowledge that existed then. Without their motion, we would make a serious injustice on our own civilization and modern values.

No discipline is void of the Muslims' names. It is a purely negative attitude from the part of non-Muslims to forget their transition from the Greek to the Western supremacy.

The Muslims, on the one hand, mediated the Greek and Latin knowledge and on the other hand, made considerable improvements and commentaries on the existing work. They added, for the first time, experiment and observation to science. They founded new branches that were still unknown. They preserved their global heritage of what is called 'science' for the following generations in the east and the west.

The preservation of this precious heritage is an unforgettable contribution of the Muslims to the human efforts. But the Muslims had meant much more than those simple transliterators or mediators. They were discoverers and inventors, too. They were a part of the modern science tradition that the Greeks, Romans, Indians and Chinese had promulgated centuries before.

A. Comprehension

(07 points)

Read the text carefully then do the following activities.

Unethical behaviours in the workplace can be defined as any action that does not conform with the standards of conduct established by the organization. Unethical behaviours can occur in the relationships between employees, in the way an employee goes about his business or how he uses company resources. Unethical behaviours can even break the law in some situations.

Employees may use company computers to engage in unethical behaviours. For example, an employee who is not permitted to use the Internet for personal reasons commits an unethical act by shopping online while working. Random Internet surfing takes away from the time he spends on work related activities. Employees sometimes use company's email to spread inappropriate websites or videos to colleagues, some of which could be considered disrespectful by the recipients.

Unethical behaviours can include "stealing" time from the company, as it is paying its employees and receiving no productivity in return. In addition to time spent on aimless Internet surfing, time misuse can consist of extending breaks beyond the allotted time, falsifying time sheets, coming into work late and leaving early and running personal matters while travelling on company business.

Some unethical acts can also be illegal when a bookkeeper or an accountant commits embezzlement by having access to the company's financial records. As well as an employee dealing with personal files, uses Social Security number to raid bank accounts or fraudulently obtain credit cards.

Adapted from Internet

1. Are these statements true or false? Write T or F next to the letter corresponding to the statement.

- Using company resources is ethical.
- At work, personal use of Internet is allowed.
- Arriving late and leaving work early is considered as a theft.

2. In which paragraph is it mentioned that

- ethical behaviours at work consist in respecting the company's code of ethics?
- employees should respect their work time to deserve their salaries?

3. Answer the following questions according to the text.

- When can an electronic address of a company be misused?
- List the different ways of stealing time from a company.
- How can an employee get extra financial gains unethically?

4. Who or what do the underlined words refer to in the text?

- his (§1)
- it (§3)

5. Choose the general idea of the text.

- All workers behave ethically in their work place.
- Morally unacceptable behaviours may occur at work.
- Employees exchange websites and videos via Internet.
