

**Second Term English Exam**

**Part One: Reading**

**Read the text then do the following tasks.**

Having scaled the heights of earth with the world's tallest building, the United Arab Emiraes has announced an ambitious new project to set up Mars' first mini city **that** will be built by robots. The Mars 2117 project was announced earlier this month in Dubai by Sheikh Mohamed Bin Rashid Al Maktoum in the presence of 138 governments in an attempt to better understand the red planet and facilitate the transport of people to **it** over the next decades.

The project will explore how people can get to Mars and how to create food and energy on the red planet. The 100 year plan will involve Emirati team of engineers along with a group of scientists and researchers. **It** aims at building scientific capacities of emiratis and transforming the universities into research centres, but mainly consolidating the passion of leadership in the generations to come.

Sheikh Bin Zayed says that the landing of people on other planets has been a dream for humans, yet human ambitions have no limits and thus can realise the most important human dream. He believes that the project is a seed planted today for next generations to reap its fruit tomorrow. **He** wishes for this project to represent the Islamic entry into the era of space exploration.
