## Introduction

In preparation for the 2019/2020 academic year, and in an attempt to improve the quality of teaching as well as pedagogical performance and pursue the reforms that have been undertaken, the Ministry of National Education via the General Inspectorate of Pedagogy has issued the following learning plans as a complementary tool to the reference documents in use in basic education cycles (Primary – middle). The present document is thus intended to facilitate understanding and implementation of the curriculum as clearly stated in the support documents. These plans also allow the achievement of coherence with the pedagogic assessment plan and the continuous assessment scheme. Henceforth, practitioners (teachers, inspectors,...) are requested to get an insight into the underlying principle of these plans to put them into practice. Moreover, these pedagogical tools are intended to be a road map that unifies the vision of the teaching and learning process through the different sequences.

## Methodological Note

The results of the national consultation on assessment presented at the national conference held on April 29th, 2017, highlighted the need to review the current assessment practices. A necessity reinforced by the field follow-up reports of the inspectors, which revealed imbalances in the implementation of the curricula due to ineffective reading and associated interpretations. This fact has prompted the General Inspectorate of Pedagogy to provide practitioners with tools that illustrate the vision, dispel misinterpretations and allow for educational performance improvement, which is one of the axes of the reform namely the training of trainers and professionalization of the main actors of the education system.

The tools designed by the General Inspectorate of Pedagogy include: the annual learning plan, the annual pedagogic assessment plan and the annual continuous assessment plan for each of the subjects of primary and middle school education in the key stages concerned by the implementation of the re-written curriculum.

### 1- The Yearly Learning Plan:

The yearly learning plan is a comprehensive template which contains learning objectives, resources, integration and assessment as well as educational projects that aims to achieve the global competence of a learning level on the basis of the target competency stated for each domain (oral interaction, interpretation of oral and written messages and production of oral and written messages) and through an integrated set of learning sections.

Each plan starts from the target competency to achieve ; its development is carried out through a problem-solving situation in its general context that the learner may encounter in his or her school or social life and a set of partial situations conducive to integration and potential remediation. The plan also contains instructions from the “support document” and the “teacher’s guide” and the estimated time to devote to the learning section to ensure an adequate implementation of this latter. **In this planning, the pre-requisites are included in order to draw teachers’ attention to the importance of the learners’ background knowledge while preparing lessons and help them regulate their teaching. Teachers are requested to check the level of assimilation of the pre-requisites regulate their teaching accordingly.**

### 2- The Yearly Pedagogic Assessment Plan

The yearly pedagogic assessment plan is a plan that synchronizes the learning implementation process with the verification of the competency development. It starts from the target competency, which is framed by standards that include the three following aspects: knowledge, methodology and values. These standards allow for both learning assessment and assessment of the learner’s effort and offer opportunity to provide learners with objective and constructive feedback.

### 3- The Yearly Continuous Assessment Plan:

This plan is another means to help teachers assess the learners’ performance during the term. They can evaluate their learners’ performance in relation to the achieved objectives in the frame of the topic dealt with.
